

Mrs. Nicholson's Happenings Special Education World

We are off to a great start this school year! My students are learning and growing in their social, math and reading goals. They have taken off with their reading this year, it has been exciting to see! I'm excited to see where the year will take us. We have added an awesome tool this year to help us learn.

Meet Milo! Milo is a robot that helps students with their social/emotional feelings and emotions. Milo has lessons built in to help individuals with special needs develop social skills that they will use in everyday life. As you can see from the picture above that Milo is powered by an iPad. The facilitator controls what lesson Milo is going to teach and the student uses the other iPad where they have to respond to Milo to do something or watch a video. This also comes with a curriculum to teach students social skills for life.

My students have really been engaged with Milo and are excited to continue learning with Milo. This has been a great asset to our school building! I can't wait to see what the rest of the school year is going to bring!

Sincerely,
Mrs. Nicholson
